

## **Car Park Report 2018/19**

Pocklington Town Council own and maintain one car park. This car park is associated with Queen Elizabeth II Field, West Green, Pocklington.

The car park is made of rolled road plainings that became heavily potholed last year and this required maintenance. The work was carried out in the summer. The car park is only intended to have light use. However, it is being used extensively by Pocklington School and this increased pressure means it will require further repair in 2018/19. The cost of repair was £1,146.00.

There is space for approximately 38 cars and during term time the car park is often full. This can cause problems for the grass cutting contractors as cars are often parked over the access gates.

The car park is not charged for and there are no parking restrictions at the present time.
